Sudoku is really the puzzle game that is meant for those individuals who want to play with numbers and logic. Given puzzles with varying difficult level, you might spend the whole day assigning the numbers 1 to 9 in the grid or you may extend your solving activity the next day. You need to have enough patience or else the Sudoku puzzle will make you go nuts.

A typical Sudoku puzzle game is composed of 81 cells which is the product of 9 rows and 9 columns. Furthermore, the puzzle is also divided into 9 sub-grids which contain 3 x 3 cells for each sub-grid. The rule is very simple. At the start of the game, 30 or more cells are initially filled up with the numbers from 1 to 9 (initially filled-up cells varies according to the difficulty level of the puzzle).

All you have to do is to fill up the remaining cells with numbers 1 to 9 to complete the puzzle. However, you need to satisfy the rule that "all numbers should only appear on each column, row, and sub-grid". For instance, if you place the number 8 on the 4th row and 2nd column of the puzzle, such number should not appear again on that particular row and column. At the same manner, such number should not also appear twice on the sub-grid it is assigned to. Such rule makes the puzzle take some time to be completed.

So how can you access Sudoku puzzles? You can get it only weekend editions of some newspapers and magazines in your locality. If it does not satisfy you, you can surf the Internet and look out for the sites which offers free online play on their Sudoku puzzles.

However, since it will take time solving a single Sudoku puzzle especially if you are just a beginner, it is quite impractical that you do your problem-solving activity in front of your personal computer. In addition, you also want to play the Sudoku game even there is no Internet connectivity or you are outside of your house. In this case, all you need is a printable Sudoku puzzle.

So how can you have a printable Sudoku puzzle? There are thousands of websites which offer free printable Sudoku puzzle. All you have to do is to locate them through search engines and presto! You will be revealed to related sites on Sudoku. Select one, and download a Sudoku puzzle of your choice. After downloading the selected puzzle from the site to your personal computer, you can now print it to produce hard copy of your Sudoku puzzle.

Most of downloadable Sudoku puzzle in these sites are on PDF format so it is important that you have an Acrobat Reader to display the puzzle correctly. In case you do not have an Acrobat Reader, you can download one for free in the Internet.

In case downloading is not your choice yet you want to have free copy of your Sudoku puzzle, there are daily syndication available on several Sudoku websites. All you have to do is to subscribe to those sites free of charge, and they will be sending straight to your e-mail inbox their Sudoku puzzle for the day.

However, they will just be sending you the puzzle for that certain day. In case you want to have more Sudoku puzzles send to you, just visit the Archive section and select the puzzle you want send on your e-mail. After retrieving its contents from your e-mail, you can print it and have the hard copy of your Sudoku puzzle.

Printable Sudoku is relatively advantageous compared to online Sudoku puzzles. Since it is now in hard copy, you can now bring it anywhere you want. You do not have to bring your laptop or have an Internet connectivity just to play Sudoku. You can also produce more hard copies for each of the family members so that all of you will enjoy completing the Sudoku puzzle with fun and teamwork as well.

Have your Sudoku puzzle printed and let everybody learn the game. Not only all of you will have fun, but your patience and problem-solving techniques will develop. Enjoy playing your printed Sudoku puzzle!
